

# American Engineering Testing (AET) Transforms Operations with Dynamics 365

AET, a leader in geotechnical engineering, construction materials testing, and environmental consulting, has been delivering certainty in the engineering field since 1974. The firm embarked on a digital transformation to centralize data, streamline operations, and enhance efficiency with Dynamics 365.

## Situation before the Transformation

- Disconnected processes across **19 offices**.
- Lack of standardized project tracking and resource allocation.
- Manual time tracking and invoicing, taking up **40+ hours per week**.
- Limited visibility into project and financial data, restricting decision-making.

## Solution

- Implemented **Dynamics 365** to centralize business operations.
- Automated project management, resource scheduling, and financial reporting.
- Enabled seamless collaboration between dispatchers, technicians, and project managers.

## Products

Dynamics 365  
Finance

Dynamics 365 Project  
Operations

Microsoft Power  
Platform

## Impact

**400+**

work hours saved  
weekly with  
automation.

**50%**

faster payroll  
processing,  
boosting efficiency.

Invoice time cut from  
**1 week to 1 day**,  
improving cash flow.

**200-300**

technicians  
dispatched daily,  
optimizing operations.

Real-time  
insights  
for faster,  
data-driven  
decisions.

Stronger team  
collaboration,  
enhancing  
productivity.
